

PROHSD

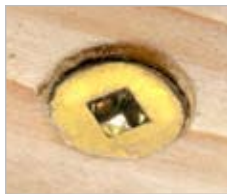

QUIK DRIVE® Auto-Feed System For Heavy-Duty Fastening

The Simpson Strong-Tie® Quik Drive® PROHSD screw driving system is an ideal solution to save time and effort when fastening heavy-duty materials, such as installing truck and trailer beds and fastening timber decking boards to timber and steel joists. The auto-feed design uses collated screws designed especially for heavy duty applications to enable quick and easy fastening. The tool extension allows stand-up driving for more efficient positioning and installation of screws.

Features:

- Fast, easy fastening in the toughest of conditions
- System eliminates pre-drilling in most materials for quicker installation
- Extension enables stand-up driving to save time and reduce worker fatigue
- Self-locking depth control has expanded countersink range
- QuikLock™ coupling allows for easy assembly and breakdown
- Built-in bit wrench makes bit changes quick and easy
- Driver bits supplied with every box of screws
- 2-year warranty

Countersink deep enough for sanding with the PROHSD auto-feed system's expanded driving capabilities.

Look for the yellow strip to ensure you're getting high quality Quik Drive® fasteners.

Quik Drive® systems allow quicker, easier screw driving (*screws not included*)

- PROHSD auto-feed system
- Extension for stand-up driving
- Adaptors for Hitachi®, Makita® and Bosch® screwdriver motors
- Quiver for keeping screws at your fingertips
- Protective tool case
- System model numbers PROHSD60IK (for driving 45 to 60mm screws) and PROHSD75IK (for driving 60mm to 75mm screws)

Adaptors for Hitachi, Makita and Bosch screwdriver motors are included with each PROHSD system.

- Hitachi adaptor: ADHG2
- Makita adaptor: MAA6807G2
- Bosch adaptor: BOA1G2

Adaptors for DeWalt®, Makita Collated, Hilti® and selected Metabo® screwdriver motors are also available.

- DeWalt adaptor: ADDWG2
- Milwaukee adaptor: ADMILG2
- Hilti adaptor: HTAG2
- Metabo adaptor (some models): MEAG2
