

QDBDT75A

QUIK DRIVE® Auto-Feed System for Fast, Accurate Metal-Roof and Cladding Fixing

Simpson Strong-Tie® Quik Drive® introduces the revolutionary screw-driving system designed especially for metal roofing: the QDBDT75. This innovative tool combines an auto-feed fastening system with an optional stand-up extension for more efficient screw fixing and reduced worker fatigue. In addition, the QDBDT75 features self-centering profile guides which center the screw on the roofing profile while transferring the pressure to the base of the steel sheet. As a result, the risk of crushed, distorted or leaking roofs is reduced.

Simpson Strong-Tie® Quik Drive®: A new perspective on metal roofing

- Extension attaches for comfortable stand-up fixing on flat roofs, and can be removed for easy auto-feed fixing on pitched roofs
- Self-centering profile guides ensure accurate roof fixing at the top of corrugated or square ridges
- Flat profile guide for cladding and flat-wall fixing
- Belt collation reduces screw waste and allows roofers to work faster without dropping screws and scratching roofing sheets
- Depth setting prevents overdriving screws and distorting the roofing sheets
- System drives screws 25mm–75mm in length

Individual profile guides fit flat profile of cladding sheets, corrugated-profile metal roofing sheets, and ribbed/square profile of square-ridge metal roofing sheets.

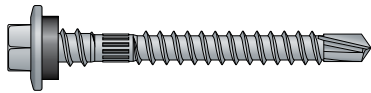

QDBT75A – Auto-feed system includes attachment with mandrel, extension, 3 profile guides, adaptors for Makita® 6827/6805/6826/6823 and most Hitachi® screw guns

Model Number	Description
BPHXBDT	Mandrel for QDBDT75 (includes BITHEXLB516)
BITHEXLB516	5/16" lobular hex driver
PBDT75PG11	Flat/cladding profile guide for QDBDT75
PBDT75PG21	Corrugated profile guide for QDBDT75
PBDT75PG31	Square-ridge profile guide for QDBDT75

Metal-Roofing and Cladding Screws for the QDBDT75

XBWSD Series – Metal to Metal

- C4 mechanically galvanised – complies with AS3566.2 Class 4
- Stocked in a variety of Colorbond® colours. Custom colour matching is also available to match any project. Contact Simpson Strong-Tie for more details
- EPDM non-conductive washers under the head of the fasteners prevent water intrusion
- Top thread lifts the sheet to the head giving it a better seal
- Box quantity 500
